

**Product description**

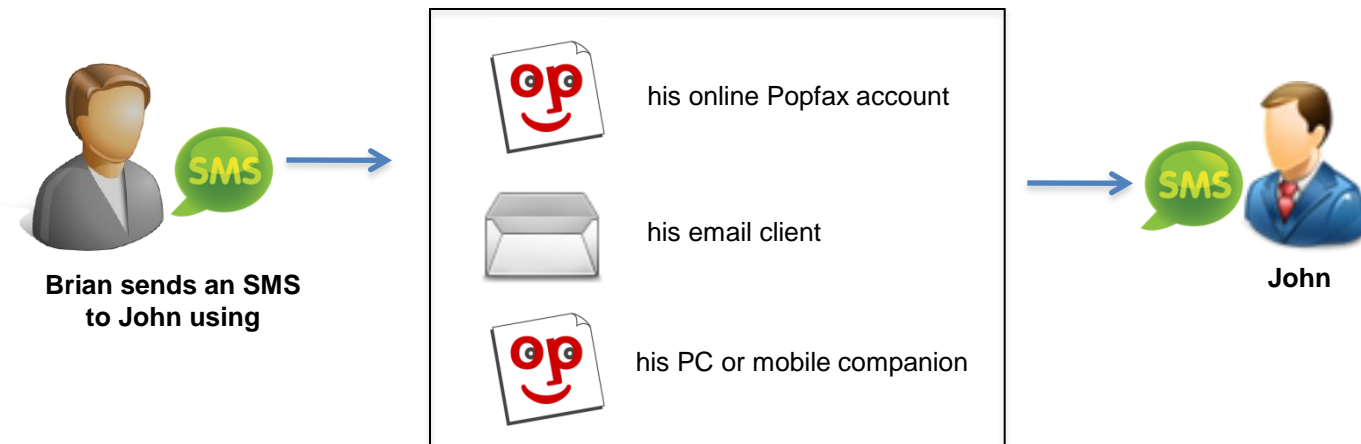

**Popfax SMS sending** - a professional unified messaging solution for businesses to send out mass messages to their customers to alert them to specials and sales. Users now can send SMSs anytime and anywhere in the world.

The Mail to SMS feature makes it particularly easy to use for automated alerts on monitored events (maintenance, deliveries, thresholds...). It also makes mass alerts as easy as an email (emergency alert, crisis meeting...).

The “SMS sending” option includes:

- ☑ Worldwide SMS sending at low rates via email, web interface, PC or mobile companion.
- ☑ Validate your phone number as the SMS sender.
- ☑ Send an SMS to multiple recipients simultaneously, to individual numbers, or to Popfax.com groups of contacts.

Popfax provides you with many ways of sending an SMS:

How it works

Send SMSs from web interface

**Send an SMS**

Destination number *	Name (Optional)	Add to Contact Book
<input type="text" value="+3312345678"/>	<input type="text" value="John"/>	<input checked="" type="checkbox"/>
<input type="text"/>	<input type="text"/>	<input type="checkbox"/>
<input type="text"/>	<input type="text"/>	<input type="checkbox"/>

\* Your number is composed by the country code plus the local number without the national prefix: e.g. for the number +44 (0)123456789 enter the number +44123456789.

Enable extended characters (Chinese, Cyrillic, Greek)  
Remaining characters: 136
